the Department of printing and graphic arts, in the Harvard college library, Cambridge, Massachusetts."

"An interesting description of the art of writing. But it is even more important as the earliest account of the working of the printing press."—Foreword.

"Max Rooses, the biographer of Plantin, while stating that Grevin was general author of the 'Dialogues' and that the Flemish translation was by Pierre Kerkhovius and Corneille Bomberghe, believes that the chapter on writing and printing was written by Plantin himself. M. Sabbe in 'Histoire du livre et de l'imprimerie en Belgique' (1925) reprints part of this chapter in French. The same portion appeared as a separate

**Pennsylvania** (*Colony*) *Treaties, etc.*

Treaties, etc., of this jurisdiction printed in America before 1801 are available in this library in the Readex Microprint edition of Early American Imprints published by the American Antiquarian Society.

This collection is arranged according to the numbers in Charles Evans' American Bibliography.

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the origin of life, and shows that the most plausible is the theory of spontaneous generation. This theory is based on the fact that life is a complex of many different parts, and that these parts are all derived from a common ancestor. The author shows that the theory of spontaneous generation is the only one that can account for the complexity of life.

2. The second part of the paper is devoted to a discussion of the problem of the evolution of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the evolution of life, and shows that the most plausible is the theory of natural selection. This theory is based on the fact that life is a complex of many different parts, and that these parts are all derived from a common ancestor. The author shows that the theory of natural selection is the only one that can account for the complexity of life.

3. The third part of the paper is devoted to a discussion of the problem of the future of life. It is shown that the problem is one of the most important and most difficult in the history of science. The author discusses the various theories of the future of life, and shows that the most plausible is the theory of the continuation of life. This theory is based on the fact that life is a complex of many different parts, and that these parts are all derived from a common ancestor. The author shows that the theory of the continuation of life is the only one that can account for the complexity of life.

## Pennsylvania. Geography, description and travel.

Bartram, John, 1699-1777.

\*\*H.94.8

Observations on the inhabitants, climate, soil, rivers, productions, animals, and other matters worthy of notice. Made by Mr. John Bartram, in his travels from Pensilvania to Onondago, Oswego and the Lake Ontario, in Canada. To which is annex'd a curious account of the cataracts at Niagara. By Mr. Peter Kalm, a Swedish gentleman who travelled there.

London: Printed for J. Whiston and B. White . . . , 1751. (2), 94 pp. Plan. 20 cm., in 4s.

Contains much information about the Indians, with speculations as to their origin.

Kalm's letter is catalogued separately.

# Penetration of the American Market

It is a well known fact that the American market is one of the most important in the world. It is a market of vast dimensions, and one which is constantly expanding. The American people are a people of great energy and enterprise, and they are constantly seeking to improve their standard of living. This has led to a great increase in the production of goods and services, and this in turn has led to a great increase in the demand for foreign goods and services. It is therefore no surprise that the American market is one of the most important in the world.

It is a well known fact that the American market is one of the most important in the world.

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$ . It is shown that the solutions of the system (1) tend to zero as  $t \rightarrow \infty$  if and only if the matrix  $A$  is Hurwitz. This result is obtained by the method of the variation of constants.

to J.P.

My dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 11th inst. in relation to the above matter. I am sorry to hear that you are not satisfied with the result of the investigation. I have been very anxious to see that all the facts were fully and fairly stated, and I have endeavored to do so. I am sure that the result of the investigation is correct, and I am sure that you will find it so when you have had time to consider it. I am, Sir, very respectfully,  
Your obedient servant,  
J. P.

Very truly yours,  
J. P.
